WHAT TO CONFIRM BEFORE ORDERING

- The marker figure is an indicative target; the batch COA and written specification govern release.
- Confirm source, part, carrier, and destination-market requirements before the first order.

Indicative document.

This sheet describes the grade we can quote; it is not a batch COA and does not confirm a specific result for a specific lot. Final specification, contaminant limits, and documentation are agreed in writing before the order. Source, part, carrier, and marker method are release parameters, not marketing descriptions.
